

Cool Shaper - Cryolipolysis Slimming Machine

Cryolipolysis is a safe procedure for delivering precisely controlled cooling that effectively and gently reaches fat cells under the skin. The treated fat cells die after being frozen (crystallized). The body eliminates the dead cells over time by naturally processing the fat. And the results are a more sculpted body.

Cryotec360 VS Old technology

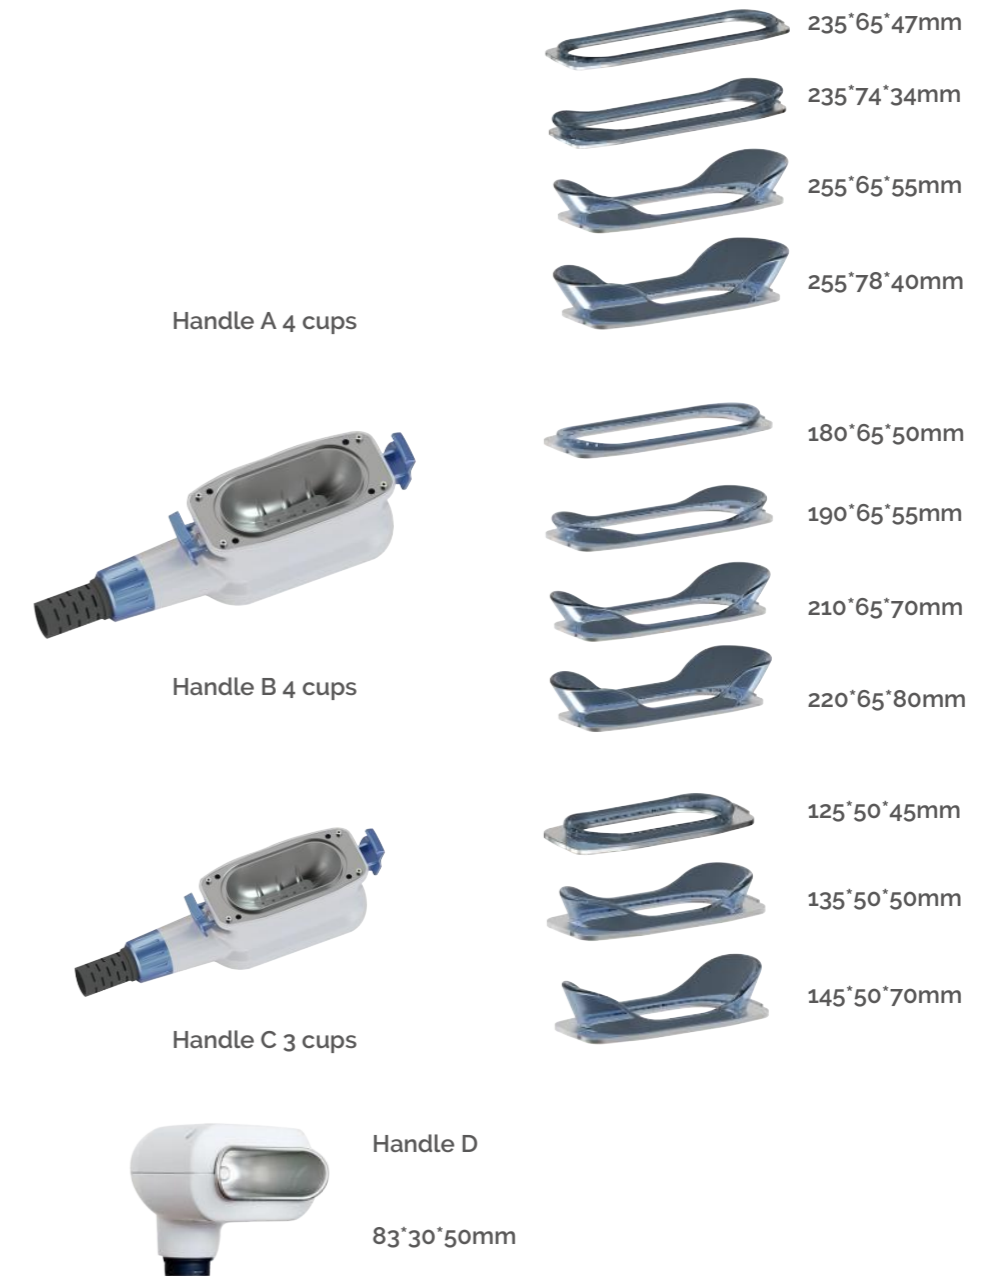

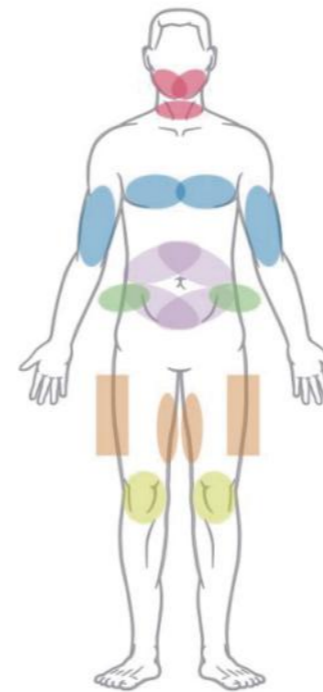

CHANGE CONTOURS WITH EASE Contours are securely fastened to the applicator and easily changed for your next treatment.

SPECIFICATION

| | |
|---------------------|---|
