

# HIFU 4D - Skin Tightening Machine

This is a machine for overall skin rejuvenation and skin tightening. Perfect for wrinkle reduction, lifting jowl and brow plus reduce nasolabial fold with non-surgical technology. HIFU (High Intensity Focused Ultrasound) 5D creates thermal coagulation zones at three different depths with high focus energy. The skin's healing response is to form new collagen and the result is long term tightened skin. This is a non-invasive, non-surgical face lifting procedure with visible results after the first session that lasts 1-1½ year making the HIFU machine one of the most popular machines on the market.

## HANDPIECES

Vmax single dot handle

1.5mm, 3.0mm, 4.5mm

3D hifu handle

1.5mm, 3.0mm, 4.5mm

1.5mm, 3.0mm, 4.5mm

6.0mm, 8.0mm, 10.0mm, 13.0mm, 16.0mm

( 4 cartridges are standard)

## SPECIFICATION

Power	1200 W
Frequency	4MHz-7Mhz
Width	1- 10 mm Adjustable
Length	5 - 25 mm Adjustable
Energy output	Energy output 0.2 - 2J/cm2
Cartridge shot	20000 lines
Cartridges	1.5mm,3.0mm,4.5mm,8.0mm (Standard) 6.0mm, 10.0mm,13.0mm,16.0mm (Optional)

Wrinkles around eyes and mouth, Eye brow

Forehead, Cheek, V-line forming, Double chin, Neck wrinkles

Inner arms, Breast, Abdomen, Inner thighs, Outer thighs, Hips & Buttocks

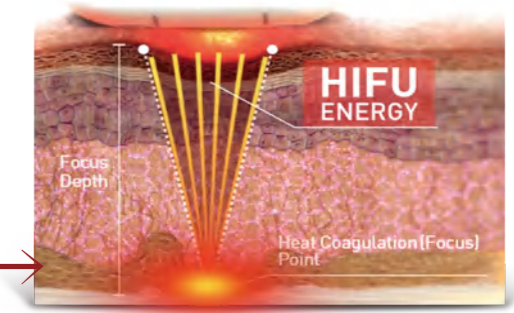

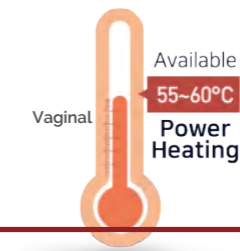

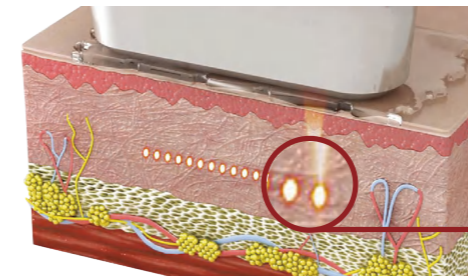

Reduce fat, Body slimming

Skin Tone Improvement

Vaginal tightening

## SCOPE OF TREATMENT

Without direct contact to surrounding areas, the concentrated waves of ultrasound are delivered to multiple skin layers and body tissue thanks to the machine's HIFU-powered transducers.

With a stable temperature of 65-75°C transferred to the target zones the process of neocollagenesis in the face is induced and body tissue is tightening to contour the body.

## BEFORE & AFTER
