

Quattro Ice Titanium Diode Laser hair removal with double handles

TOUCH SCREEN HANDLE

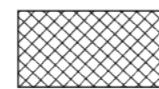

MULTIPLE POWER COMBINATIONS

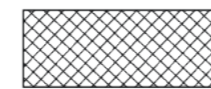

12'12mm
600W 1200W

12'20mm
1200W

12'24mm
1600W 2000W

12'28mm
2000W

SPECIFICATION

Power	3000W
Power of handle	600-2000W optional
Wavelength	808nm (755nm+808nm+1064nm optional)
Machine screen	12.1 inch
Handle screen	1.54 inch
Energy density	1-120J/cm ² (Deviation $\leq \pm 2\%$)
Pulse width range	1-200ms
Spot size	12'12mm ; 12'20mm; 12'24mm; 12'28mm
Frequency	1-10HZ (600-1200w) 1-20HZ (1600-2000w)
Cooling System	TEC cooling system
Voltage	AC220V $\pm 10\%$ 10A 50HZ , 110V $\pm 10\%$ 10A 60HZ

ADVANTAGES

Effective

Guaranteed results with a power output of 2000 w

Stable

American laser bar to last over 100 million shots

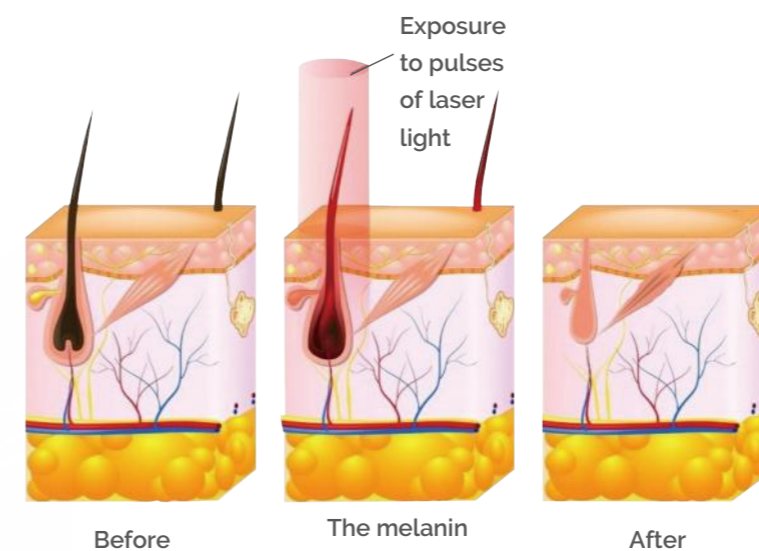

Easy to operate

Easy Operation software with presets for treatments of all skin types

Strong Cooling System

A TEC cooling system ensures the comfort of treatment and continuous work of the machine

PRINCIPLE OF TREATMENT

Quattro Ice Titanium - Diode Laser Hair Removal Machine is the most advanced and effective machine on the market for hair removal. The laser reaches the hair follicle thanks to properly adjusted laser wave length and pulse width, The light energy is adsorbed and converted into thermal energy to destroy the hair follicle. This makes the hair lose its ability to regenerate but does not damage surrounding tissue. The Diode Laser Hair Removal Machine removes body hair safe, quick and with long lasting results using a painless technology.

BEFORE & AFTER
